SUBJECT INDEX

Absolute summability
  Factors for $|\bar{N}, p_n; \delta|_k$ summability of Fourier series 53
  A note on two absolute summability methods 125
Almost periodicity
  Almost periodicity of some Jacobi matrices 175

Binomial determinants
  Combinatorial meaning of the coefficients of a Hilbert polynomial 93
Boundary value problem
  Solution of convex conservation laws in a strip 29

C^*-enveloping algebra
  Topological algebras with C^*-enveloping algebras 201
Classical propositional calculus
  Remark on Gronwall's inequality 73
Conservation laws
  Solution of convex conservation laws in a strip 29
Convex sequence
  On L^1 convergence of a modified cosine sum 235
Critical exponent
  Non-existence of nodal solution for m-Laplace equation involving critical Sobolev exponents 23
Cryptanalysis
  An RSA based public-key cryptosystem for secure communication 147

Decryption
  An RSA based public-key cryptosystem for secure communication 147
Determinantal ideals
  Combinatorial meaning of the coefficients of a Hilbert polynomial 93
Differential polynomials
  On deficiencies of differential polynomials 129
Diffraction
  Three dimensional diffraction of compressional waves by a rigid cylinder in an inhomogeneous medium 189

Eigenvalue
  Non-existence of nodal solution for m-Laplace equation involving critical Sobolev exponents 23
Elastic inhomogeneity
  Three dimensional diffraction of compressional waves by a rigid cylinder in an inhomogeneous medium 189
Encryption
  An RSA based public-key cryptosystem for secure communication 147
Enveloping algebra
  Topological algebras with C^*-enveloping algebras 201
Explicit formula
  Solution of convex conservation laws in a strip 29

Fourier series
  Factors for $|\bar{N}, p_n; \delta|_k$ summability of Fourier series 53
Fractional calculus operators
  A note on the identity operators of fractional calculus 141
Frequency
  On the frequency of Titchmarsh's phenomenon for $\zeta(s)$—VIII 1

Gauss hypergeometric function
  A note on the identity operators of fractional calculus 141
Generalised Dirichlet series
  On the zeros of a class of generalised Dirichlet series—XI 225
Generalized parabolic sheaf
  Generalized parabolic sheaves on an integral projective curve 13
Gronwall's inequality
  Remark on Gronwall's inequality 73

Hermitian algebra
  Topological algebras with C^*-enveloping algebras 201
High data bit rate communication
  An RSA based public-key cryptosystem for secure communication 147
Hilbert polynomial
  Combinatorial meaning of the coefficients of a Hilbert polynomial 93

Identity operator
A note on the identity operators of fractional calculus 141

Jacobi inversion
Almost periodicity of some Jacobi matrices 175

Köthe sequence space
Topological algebras with C^*-enveloping algebras 201

L^1 convergence
On L^1 convergence of a modified cosine sum 235

Lattice paths
Combinatorial meaning of the coefficients of a Hilbert polynomial 93

Lower bounds
Proof of some conjectures on the mean-value of Titchmarsh series-III 83

M-ideals
$C(K, X)$ as an M-ideal in $WC(K, X)$ 217

m-Laplacian
Non-existence of nodal solution for m-Laplace equation involving critical Sobolev exponents 23

Markovian cocycle
Stochastic dilation of minimal quantum dynamical semigroup 159

Maximal monotone operator
Maximal monotone differential inclusions with memory 59

Mean value
Proof of some conjectures on the mean-value of Titchmarsh series-III 83

Meromorphic functions
On deficiencies of differential polynomials 129

Modified cosine sum
On L^1 convergence of a modified cosine sum 235

Nevanlinna theory and deficiencies
On deficiencies of differential polynomials 129

Projective curve
Generalized parabolic sheaves on the integral projective curve 13

Q-algebra
Topological algebras with C^*-enveloping algebras 201

Quantum dynamical semigroup
Stochastic dilation of minimal quantum dynamical semigroup 159

Quantum stochastic differential equation
Stochastic dilation of minimal quantum dynamical semigroup 159

Random potential
Almost periodicity of some Jacobi matrices 175

Regular space
An example of a regular space that is not completely regular 49

Relaxation
Maximal monotone differential inclusions with memory 59

Residue-Cagniard method
Three dimensional diffraction of compressional waves by a rigid cylinder in an inhomogeneous medium 189

Resolvent
Maximal monotone differential inclusions with memory 59

Resolvent convergence topology
Maximal monotone differential inclusions with memory 59

Riemann zeta-function
On the frequency of Titchmarsh's phenomenon for $\zeta(s)$—VIII 1
On the zeros of a class generalized Dirichlet series—XI 225

Riemann-Liouville operators
A note on the identity operators of fractional calculus 141

Schur property
$C(K, X)$ as an M-ideal in $WC(K, X)$ 217

Segal algebra
Topological algebras with C^*-enveloping algebras 201

Selection theorem
Maximal monotone differential inclusions with memory 59

Summability factors
Factors for $|\bar{N}, p_n; \delta|_k$ summability of Fourier series 53

Summability methods
A note on two absolute summability methods 125

Titchmarsh phenomenon
On the frequency of Titchmarsh's phenomenon for $\zeta(s)$—VIII 1

Titchmarsh series
Proof of some conjecture on the mean-value of Titchmarsh series-III 83

Weakly continuous functions
$C(K, X)$ as an M-ideal in $WC(K, X)$ 217

Zeros
On the zeros of a class of generalized Dirichlet series—XI 225
